

## VOICE GATE BLOOD BANK MANAGEMENT SYSTEM(VBODS)

Save Lives. Ensure Safety. Manage Every Drop Intelligently.

### About VBODS

VBODS (Voice Gate Blood Bank Management System) is a comprehensive, standards-compliant platform designed to efficiently manage blood bank operations with high levels of safety, traceability, and regulatory compliance.

### Solution Overview

VBODS enables healthcare institutions to digitize end-to-end blood bank operations, efficiently manage donor registration and screening, track blood units from collection to transfusion, ensure safety, compliance, and complete traceability, and optimize inventory to minimize wastage.

### Why Choose VBODS

Ensures high safety standards, provides real-time analytics for better decision-making, and offers a scalable system adaptable to growing healthcare needs.

## Core Modules

- Donor Management
- Blood Collection & Processing
- Testing & Quality Control
- Inventory Management
- Issue & Transfusion Management
- Monitoring & Dashboards

## Key Features

- Complete blood bank lifecycle management
- Real-time inventory tracking
- Full traceability
- Expiry alerts and shortage monitoring

## Standards & Integrations

- National blood bank regulations (India)
- WHO blood safety guidelines
- Audit-ready traceability and reporting
- Data privacy compliance (DPDP / HIPAA-ready)

## Business Benefits

Enhances blood availability, reduces wastage, ensures transparency, improves operational efficiency, supports regulatory compliance, and strengthens overall patient safety.
