

VOICEGATE DIAGNOSTICS & INVESTIGATIONS MANAGEMENT SYSTEM (VDIMS)

Accurate Diagnostics. Standardized Reporting. Intelligent Insights

About VDIMS

VDIMS (Voice Gate Diagnostics & Investigations Management System) is a comprehensive, standards-compliant platform designed to manage, automate, and optimize diagnostic and laboratory workflows, ensuring accuracy, standardization, and faster turnaround times.

Solution Overview

VDIMS enables healthcare organizations to digitize diagnostics workflows, standardize test coding and reporting, improve lab efficiency, ensure compliance, and integrate seamlessly with hospital systems.

Why Choose VDIMS

VDIMS is a standards-driven platform that offers seamless integrations, real-time analytics, a scalable system, and a secure and compliant environment for efficient diagnostic management.

Core Modules

- Test Ordering & Registration
- Sample Collection & Processing
- Lab Processing & Integration
- Results Management & Reporting
- Workflow & Turnaround Management
- Analytics & Insights

Key Features

- End-to-end diagnostics workflow automation
- Standardized test coding and reporting
- Real-time lab monitoring dashboards
- Instrument integration and automation
- Barcode-based sample tracking

Compliance & Standards

- LOINC & ICD-11 compliance
- HL7/FHIR readiness
- HIPAA/DPDP compliance & Audit-ready reporting

Business Benefits

VDIMS enables faster turnaround time, ensures standardized reporting, improves operational efficiency, reduces errors, supports compliance readiness, and enhances overall patient experience.
