

# VOICEGATE INTELLIGENT MATERIALS MANAGEMENT SYSTEM (VIMS)

Track. Control. Optimize. Transform Material Management.

## About VIMS

VIMS (Voice Gate Intelligent Materials Management System) is a comprehensive digital platform designed to streamline, automate, and optimize material planning, procurement, inventory, and consumption, enabling real-time visibility, control, and operational efficiency.

## Solution Overview

VIMS enables organizations to digitize end-to-end materials management processes, optimize inventory levels, improve procurement planning, track materials in real time, and ensure compliance and audit readiness.

## Why Choose VIMS

VIMS offers complete lifecycle automation with intelligent inventory management, real-time tracking, customizable workflows, and a scalable architecture to efficiently manage materials across the organization.

## Core Modules

- Material Planning & Indenting
- Procurement & Vendor Management
- Inventory & Warehouse Management
- Material Movement Tracking
- Consumption & Utilization Monitoring
- Analytics & Reporting

## Key Features

- End-to-end materials lifecycle management
- Real-time inventory visibility
- Automated procurement workflows
- Intelligent reorder and stock optimization
- Barcode/RFID-based tracking

## Compliance & Standards

- Financial compliance
- Inventory best practices
- Data privacy (DPDP)

## Business Benefits

VIMS reduces inventory costs, improves procurement efficiency, enhances stock visibility, enables data-driven decision-making, ensures compliance readiness, and increases overall productivity.
